## **92756, 92756FLY & 92757 – Alloy Top Yoke Fitting the Fork Adaptor**

### **FITTING INSTRUCTIONS**

The fork adaptors are provided to convert the fork tops into the traditional Royal Enfield screw in style fitment.

The tops of the fork stanchions should be removed with a 28mm spanner (these can be quite tight and you may find that lowering them slightly to gain access and then re-tightening in the bottom yoke will facilitate disassembly – carefully apply heat if necessary).

Screw on the fork adaptor (tighten with a ½ inch Allen key).

The leg is then ready to screw in to the alloy yoke (be careful not to lose the 'O' Ring)
