Fixing Instructions for Electrics cover kit 93134

These are the items you will have received in your kit

1. You will need a 13mm ring spanner or socket and a 4mm allen key
2. Carefully place the mounting plate in position – it will be easier to insert the plate from the near-side (gear lever side) of the bike – take care to align the holes in the mounting plate with the holes already drilled in the frame bracket – A in photo
3. Secure the mounting plate in position with the 2 supplied M8 stainless steel bolts and stainless steel washers – A in photo
4. Carefully place the plastic cover plate in position – take care not to scratch the plate as it is manoeuvred into position
5. Secure the cover plate with the 2 supplied M6 stainless button head screws and stainless steel washers – B in photo. Take care not to over-tighten these
