## Fixing Instructions for: Side Panels – Part number 93030

These are slim replacement covers for oval side boxes for C5 pre-Euro 4 models.

### These are the items you will have received in your kit:

Part number 93030 for C5 models 2009-2016 - Slim type oval side cover; M6 bolt; 6mm serrated washer; bracket with rubber grommet fitted.

**NOTE:** at the final stage of fitting ensure the engine mounting nut is tightened against the inside of the cover washer and not against the plastic!

Remove the existing side cover and the nut and washer from the fixing bolt – this bolt also serves as the upper rear engine mount.

Using the bolt and washer supplied, fit the new bracket so that the hole and grommet are located as shown in the photo right.

Locate peg on inside of replacement cover into the grommet on this bracket.

Refit and tighten the nut and washer on the fixing bolt.

**Note:** On some models variance in the exhaust pipe will put the front edge of the cover in close proximity to the pipe. In such cases we advise the use of exhaust wrap for protection.

**In all cases:** ensure that engine mounting nut is tightened against the inside of the cover washer and not against the plastic!
